## ❶ Mercury Marine 5.7-liter V10 Platform

The new V10 engines leverage a naturally aspirated powerhead featuring class leading 5.7 liters of displacement and a performance inspired quad cam design to deliver exceptional performance. The V10 outboards are represented by the Mercury 350 and 400hp Verado models, the 350hp SeaPro model, and the Mercury Racing 400R model. The new V10 platform offers more low-end torque, improved acceleration and top speed, and better fuel economy than its predecessor. Plus, the new engines deliver full power using 87 octane fuel.

## ❷ Navico Group Fathom e-power system

The Fathom e-power system is an integrated lithium-ion auxiliary power management system that delivers reliable power and unparalleled performance for the marine and RV sectors. Fathom is a fully vertically integrated solution for boaters comprised of energy storage, power conversion and digital monitoring and control. The system allows users to extend time away from the charge source by providing more battery capacity and efficiently managing the electrical system, while also eliminating the noise, vibration and fumes associated with traditional generator experiences. Additionally, an intuitive user interface allows end users to easily monitor and control their power on and off the vessel via multifunction displays or smart mobile devices. Fathom is available in 12V, 24V and 48V customizable kits and is designed to integrate into a wide range of boats and recreational vehicles.

## ❸ Premier Marine 230 Sunsation Angler

The new Sunsation Angler pontoon features dual sport versatility. Designed for recreation at the front and purposeful fishing in the back. Bow port and starboard loungers and a mid-ship couch give families everything they need to cruise and relax, while the stern features a fishing layout with everything the angler needs. The stern features two fishing chairs, with the option to add a third and provides ample space to move around. The new angler station comes complete with a large livewell, designated baitwell, six rod holders, tackle storage with three tackle boxes, ruler, tackle and tool holders, cupholders and a storage drawer. What really sets this pontoon apart is direct access to the water with the patent-pending Open Water Panels on both the port and starboard sides as well as the aft. With a lift of a lever, anglers can swing open the rear side panels, locking them into place on the outside of the pontoon.

## ❹ Propspeed Stripspeed

Developed to help Propspeed applicators prepare metal surfaces for reapplication, Strip-speed removes foul-release coatings in 30-minutes or less. There is no mixing required and its thick consistency easily hangs on vertical and overhead surfaces, making it easy to use. Stripspeed is non-flammable, non-caustic, DCM- and NMP-free, and doesn't create toxic dusts or debris. Unlike grinding or using abrasives, Stripspeed doesn't cause mechanical wear through multiple refits, increasing the lifetime of the metal.

## ❺ Radian IoT

By installing a self-powered Radian device prior to consumer delivery, Radian IoT takes the benefits of GPS monitoring solutions coupled with unlimited geofencing capabilities to turn boats, trailers and powersports assets into data generators that deliver actionable intelligence. An industry first, Radian's unique platform provides a wealth of operational and experiential data that will transform the profitability of dealers, manufacturers, marina operators and rental operations.
